

MBARA Diver's Reef Survey Form Rev 11 May 2013

Clear Form

Reef Number and Name

Latitude Longitude Was published lat/lon correct?
(00 00.000) (00 00.000)

GPS Manufacturer & Model:

Sonar Depth (feet) Survey Date Time

Weather Conditions Sea Condition

Boat Name Boat Captain

Dive Leader

Dive Team Members

Depth Gauge Depth (feet) Diver Bottom Time (minutes)

Water Temp Surface (Fahrenheit) Water Temp Bottom (Fahrenheit)

Water Visibility Surface (feet) Water Visibility Bottom (feet)

Thermocline Depth (feet) Current Direction Current Speed (knots)

Other Water Column Characteristics (check all that apply)

- Plankton Algae Jellyfish Turbid Other

Bottom Composition (check all that apply)

- Sand Silt Mud Gravel Shell Other

Reef Materials & Quantity

Reef Height at Highest Point (measured from base to top of the reef)(feet)

Physical Condition (Durability, stability, storm damage, other damage or movement):

- No damage Minor damage Moderate damage Major damage
 No movement Minor movement Moderate movement Major movement

Explain damage/movement and suspected cause

Fish Counts (Click on the hyper-links below for identification)

<input type="checkbox"/> Angelfish-Blue	<input type="radio"/> 1	<input type="radio"/> 2-10	<input type="radio"/> 11-100	<input type="radio"/> 101+	Length (inches) <input type="text"/>	Comments <input type="text"/>

Observations

Brian Higdon speared a Gray Snapper. After he placed the fish on a stainless steel diaper-pin type stringer and attempted to remove the spear and its tether line, he was approached by a Goliath Grouper. Brian poked the Goliath with his spear shaft to get the Goliath to go away. However, the Goliath was not detoured and took the speared fish, stringer and speargun. Bob and Brian managed to chase the Goliath and grab the speargun stock and cut the tether. The Goliath had swallowed both the fish and stringer. Some of the tether was also swallowed and the Goliath proceeded to swim and drag the spear attached to the tether. Bob followed the Goliath for 15 minutes and was able to grab the spear and remove it and remove the swallowed tether in the process. There is some video of this event when the Goliath first approached the wounded and missed it. Then, there was video of Brian pursuing the Goliath swimming away with his speargun in tow.

Bob suspects the Goliath may have been provoked to attack the only one of two Gray Snappers at the reef site because of the absence of any other large fish on the site. The site had an abundance of small bait fish. However, there was only two moderate sized fish (two Gray Snappers) suitable for Goliath prey. The Goliath may have acted out of desperation for food and low availability of sizeable prey.
